

The background of the slide is a close-up, slightly blurred image of a honeycomb. The hexagonal cells are filled with a golden-brown substance, likely honey. A small, dark-colored bee is visible in the center of the frame, positioned slightly above the title text. The overall lighting is warm and soft, highlighting the texture of the honeycomb.

Honeycomb Mead

By Cathal, Adam and Kieran

Page Layout

The page layout I was going for when I decided to code was a simple design where it would feature everything in the center.

Due to the quality of picture the decision was to use as much imagery as possible.

Idea was to show the content we are selling with information that grabs attention

Images

- We chose to use pictures of the natural landscape to emphasize how our product is made using natural means with natural ingredients. No artificial additives or processes.

Colours and Logo

The hexagons, and a colour scheme of brown and yellow is the perfect representation of our product. We decided to use hexagons in our logo because they're a shape commonly found in beehives and are closely linked to the honey making process. The use of hexagons in our design reinforces the idea that our drink is made with real honey and helps to create a visual connection with the natural and organic aspects of our product

First we need to make our colour scheme

Now. Blend them as one
